BAG CLOSING TECHNOLOGY

WHO IS SEW-RITE INTERNATIONAL?

Sew-Rite International (SRI) was established in 1969, offering the widest range of equipment and services exclusively to the bag closing market. We have constructed a unique operation dedicated to providing the global and African market with access to a comprehensive infrastructure of equipment and support.

Sew-Rite is the largest supplier industrial bag closing machines in Africa. With a combined staff knowledge of over 135 years, we are able to provide a cost effective solution for the bag closing industry by means of stitching and heat sealing. Accrued to this, our technical support for the products we market is unparalleled.

Sew-Rite maintains a complete inventory of spares & accessories for Union Special, Newlong, Fischbein & SRI brands of bag stitching machines. Along with keeping huge stocks of a broad range of machines and premium quality bag-closing threads, all orders are subject to the same day despatch policy. Technical support is backed by a fully equipped workshop staffed with European trained technicians, which has enabled **Sew-Rite** to extend unequalled levels of service to the industry.

We believe in forging long-term relationships with our clients and offer consulting services that draw on our many years of experience in the industry.

From portable to semi-automatic to fully-automated inline systems, we supply the World.

SRI Brands

Due to the exorbitant prices of branded machines, **Sew-Rite** has embarked on manufacturing machinery of high quality and reliability to offer to our clients. We now offer our extended range of machinery, namely the **SRI brands (MKII & MKIII)**. The machines have been built in conjunction with brand name machines to ensure parts compatibility between European and American brands of machinery. This process has enabled us to market our bag stitching machinery at unbeatable prices without compromising on quality.

"Our personal brand is a promise to our clients... it is a promise of quality, consistency, competency and reliability."

HIGH CAPACITY INLINE SEWING HEADS

SR MK3 STANDARD

SR MK3D DOUBLE NEEDLE

SR MK3F CORROSIVE MATERIALS

SR MK3AC AUTO CUTTER

FISCHBEIN MODEL 100

SR MKV

Application

High speed sewing heads used for plain sewing of every type of open-mouth bag. Including paper & woven polypropylene. Typical application for these sewing heads requires the machine to be mounted on a pedestal overhanging a production conveyor. Numerous stitching operations can be performed from semi to fully automatic operations.

SR MK2

SR EXPRESS

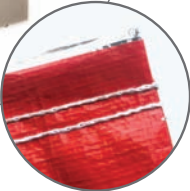

SR MK2B BATTERY

NP7A

**N320A HEAVY DUTY
SINGLE NEEDLE DOUBLE THREAD MACHINE**

N620A DOUBLE NEEDLE CLOSER

Application

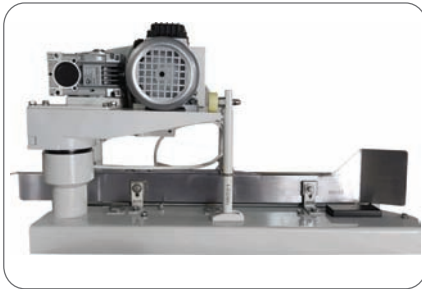

The portable models of the bag stitchers are designed to seal open mouth bags made of jute, burlap, cotton, paper and woven polypropylene at a rate of 450 bags per hour. All machines supplied are tested and quality checked in our workshop before being despatched. Please remember to state what bag material you wish to close, so that the machines are set accordingly. Portable machines are very versatile and can be mounted on pedestals with bag conveyors for your convenience.

Sew-Rite is Africa's largest stockist of accessories, spare parts and machines to the World's bag making and bag closing industry.

Our massive investment in volume manufacturing and purchasing of spares supports our commitment to provide an unmatched level of service to the global market. The spare parts are precision engineered using the highest quality materials and are fully guaranteed.

All orders receive our 'same-day' despatch policy, with each part being quality controlled. Local and international freight rates are negotiated with reputable service providers to ensure that your orders are delivered at the best price without compromising on efficiency.

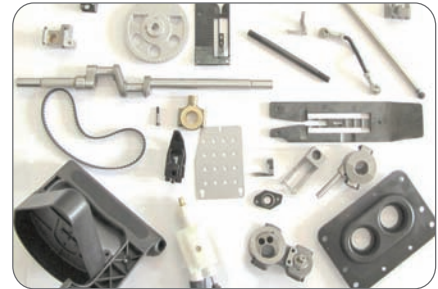

Spares are available for Fischbein, Newlong, Union Special & SRI brands of machinery.

MACHINES

HEAT SEALING MACHINERY BAND SEALERS

KBV1

KBV2

KBV2H HANDLE MACHINE

HOT FOIL PRINTER

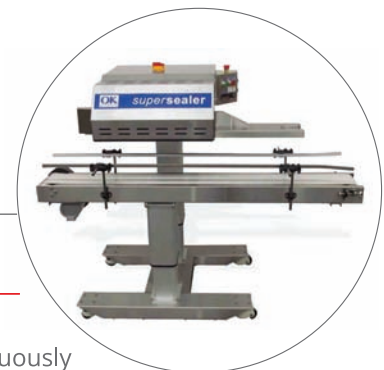

Application

Band sealers are ideal for efficient heat sealing of light to heavy weight plastic bags. These machines are a reliable and affordable solution for the sealing of plastics bags filled with rice, beans, salt & any other granular product. These innovative premium band sealers close bags fast & continuously. All models are height adjustable for different bag sizes and are equipped with a speed control. The machine is available with bag counters and hot foil printers as add ons.

HEAT SEALING MACHINERY HOT AIR SEALERS

SS1 POWDER COATED

SS2 STAINLESS STEEL

Application

The Supersealer SS1/SS2 Hot Air Bag sealer utilizes hot air to continuously seal a wide range of bag materials at high speed and efficiency. The advanced airflow, sophisticated controls and rugged painted or stainless construction ensures continuous uptime performance in all applications. These sealers produce neat, attractive bag closures that are strong enough to resist breakage & spillage during handling or transport. With its increased efficiency, Supersealer guarantees customers increased productivity all round. Ideal for use in the poultry, snack food, fertilizer and pet food industries.

Sew-Rite thread provides you with Quality, Strength, Assurance and Choice.

For over 50 years, Sew-Rite Premium bag sewing thread has been recognised for its quality and sewing performance.

If you're concerned with package integrity and maximising your sewing capacity, Sew-Rite thread is the obvious solution.

- *100% Virgin Polyester Fibre*
- *More thread per cone*
- *Lower sewing friction*
- *Longer shelf life*
- *Mildew resistant*
- *Sew-Rite U.V. stabilised*
- *Available in 7 colours*

Available in a wide variety of sizes, 140g, 2kg, 5kg and 10kg rolls.

PRECISION WOUND THREAD

Sew-Rite International's bag sewing threads for packing industries feature highbreaking strength and are designed to ensure maximum machine-based production capability. Sew-Rite can supply a wide range of different qualities, compositions and colours. Where thread is used as a packing component for foods, it will have been officially certified by independent regulatory institutions.

Recommended for use in high speed fully automatic systems like Binder and Buhler.

Our food grade thread cones are individually heat shrunk to ensure total hygiene at all times before use. Sew-Rite Supplies bag closing thread for portable and stationary heads. They range from 140g to 10kg cones. We also supply premium precision wound food grade, lubricated knotless thread.
